EXPERT'S OPINION

2420 GD 14

for Messrs: Deutsche Steinzeug Cremer & Breuer AG
Servaisstrasse
53347 Alfter-Witterschlick / Germany

Product: HT processed file DSCB

The product distributed by the company mentioned above was examined according to ISO 22196:2011 for its antibacterial efficacy. As test germs *Staphylococcus aureus* and *Escherichia coli* were chosen. These organisms can cause infections in humans and animals. Especially in the clinical sector they are responsible for a variety of secondary infectious diseases.

The results are summarized in the test report 4480/8 dated 24 July 2013 of the company ISEGA Forschungs- und Untersuchungsgesellschaft Aschaffenburg, Germany.

After contact of the test germs for 24 h at 36 °C with the products mentioned above, a reduction of the germs of 99.99 % compared to the initial number of germs at the beginning of the test was detectable in case of all listed microorganisms.

The result verifies a very high antibacterial activity of the product against the tested germs.
